OBJECTIVE

Final year B Tech CSE Student, with strong skilled in Python, Core Java. Passionate about developing efficient software solutions and leveraging analytical thinking to solve real world challenges. Eager to apply technical knowledge in innovative projects and continuously enhances problem solving abilities.

EDUCATION

Year	School/College/University	Degree	Subject	Marks	%age
2023-27	Jagannath University Jaipur	B Tech	CSE		
2021-23	R.L.S.Y. College Bettiah	12th	PCM	402/500	80.4%
2020-21	Kamal Prasad H.S. Inarwa Bazar	10th	ALL	417/500	83.4%

SKILLS

- Programming Language: Basics of (C/C++, Core Java, Core Python)
- Web Technology: HTML, CSS, JS, React, Tailwind CSS
- Tools / IDEs': Google Collab, VS Code, Jupiter Notebook, PyCharm, IntelliJ
- Software: MS Office, Power BI
- Database: MY SQL, MongoDB
- Other: Computer Networking

PROJECTS

- **ObjectIQ AI-powered Smart Surveillance System for Human and Weapon Detection System:**
  Developed OBJECTIQ, an AI-powered intelligent surveillance system using YOLOv8, Flask, OpenCV, and MongoDB Atlas, **IoT** for real-time crowd counting, weapon detection, suspicious activity detection, automated email alerts, and role-based dashboard management; published a research paper based on the project.
- **Crowd count People counting system using video analysis:**
  Developed during Infosys Springboard Internship 6.0: Built an AI-powered crowd monitoring system using YOLOv8n, Deep SORT, Flask, and OpenCV featuring real-time people counting, multi-zone analytics, heatmaps, secure role-based access, and report generation; authored a research paper based on the project for publication.
- **Personal Portfolio:** (Open)
  The portfolio is fully functional and created in HTML, CSS and JS.

RESEARCH / PUBLICATION

Research Presentation | ICESSM-2026 | May 2026

- AI-Driven Data Visualization for Big Data Analytics and Decision Support — Authored a review paper exploring AI-powered data visualization, Big Data analytics, visual analytics tools, interactive dashboards, and AI-assisted decision support for extracting actionable insights from complex datasets.

Research Paper Publication | IJSREM (Volume 10, Issue 6) | Jun 2026

- Object Detection and Tracking for Smart Surveillance with Automated Email Alerts — Developed a real-time surveillance system using YOLOv8 and Deep SORT to detect and track people and weapons in video streams and automatically send email alerts with captured frames for security monitoring.

INTERNSHIPS / TRAINING

❖ Python Essentials	(Cisco Networking Academy)	July-2024
❖ Web Development	(Edunet Foundation)	July-2024
❖ Data Analysis using AI-LLMS	(Connecting Dreams Foundation)	Oct-2024
❖ AI with Data Analysis	(Edunet Foundation)	Nov-2024
❖ Networking Essentials	(Cisco Networking Academy)	July-2025
❖ University Emergent Technology	(AICTE + Edunet Foundation)	Jun-2026

CERTIFICATIONS

- Kushal Yuva Program (BSDM)
- Certificate in Computer (N-IT Computer Education)
- Core Java (Learn Vern)
- Indian Knowledge System (NPTEL)
- Python programming (geeksforgeeks)
- Data Analytics Job Simulation (Deloitte)
- Technology Job Simulation (Deloitte)
- Computer Hardware (Learn Vern)
- Spoken English Course (Learn Vern)
- Graphic Designing with Canva (Learn Vern)
- Excel (Analytics Vidhya)

DECLARATION

I hereby declare that particular of information and fact states here in above are true, correct and complete to the best of my knowledge and belief.
